

Your Practice Has a MIPS Eligible Clinician in 2019

Quality Insights Can Help You Avoid the 7% Medicare Penalty

Need Help with the Quality Payment Program?

Quality Insights is available to help clinicians in Delaware, New Jersey, Pennsylvania, and West Virginia be successful in Medicare's Quality Payment Program (QPP), which was originally implemented in 2017. Through two Centers for Medicare & Medicaid Services (CMS)-funded initiatives, Quality Insights provides no-cost guidance to help your clinician(s) not only avoid this year's 7% Medicare penalty, but earn an incentive payment instead. Whether your practice plans to participate in the Merit-based Incentive Payment System (MIPS) or an Alternative Payment Model (APM), we can help!

CMS has created a comprehensive [QPP website \(https://qpp.cms.gov\)](https://qpp.cms.gov) that hosts a myriad of resources related to program requirements, but we know that busy clinicians and practice managers need help to understand and implement the actions necessary to avoid the penalty. In 2019, a clinician or group must achieve a minimum MIPS score of 30 points.

It doesn't matter if you are one of the new MIPS eligible clinician types (Physical Therapist, Occupational Therapist, Speech Pathologist, Clinical Psychologist, Audiologist, or Registered Dietician) or you successfully reported MIPS data for the last two years - we can help you. Every year CMS changes the reporting requirements, so let us walk you through the process, step-by-step.

Quality Insights Can Help – 360 Degree Support

Technical Assistance / Resources / Education / Networking

Quality Insights QPP subject matter experts will help you select measures, explain group vs. individual reporting, review submission method options, calculate an approximate MIPS score, and answer questions.

Additionally, you will be invited to attend educational sessions, have 24/7 access to Quality Insights resources and webinar recordings, and receive QPP updates as soon as CMS releases them via electronic newsletters and bulletins.
